Career Services Partners
If you see any of our Career Services Partners at this year’s fair, stop by and say “Thanks!”

For more information about the Career Services Partners Program contact Jim Desrochers (jtdesroc@mtu.edu) or call 906-487-2313.
Linamar Corporation

Linamar is a diversified global powertrain manufacturing company of highly engineered products. Linamar is world renowned for its precision machining expertise. From a single lathe in Frank Hasenfratz’s basement to a multi-billion dollar global manufacturing company, Linamar has come a long way in its short history. Today the company operates 40 manufacturing facilities around the world. Our precision products provide the light vehicle, commercial truck, off-highway, energy and industrial OEM markets with powertrain system solutions. Our Skyjack brand is a global leader of aerial work platforms to the construction and access markets. The company is comprised of four key divisions - Driveline, Industrial Commercial Energy (ICE), Manufacturing and Skyjack.

Linamar’s Driveline Systems Group (located in Southfield and Livonia, Michigan) is a leading designer and manufacturer of gear-driven systems for the mobile and industrial markets. From R&D and concept design through prototype development and production, the Driveline Systems Group supports its customers’ program goals and objectives by providing customized solutions.

Mclaren Performance Technologies (located in Livonia, Michigan) is the R&D and testing facility supporting all divisions within Linamar. Mclaren has a rich history in racing and powertrain performance and has evolved to become a product development, test and prototype operation with a focus on original equipment manufacturing. McLaren is fully integrated into the Linamar family as a vital resource in the engineering and development cycle for the systems and components Linamar provides to OEMs.

3M

Welcome to a world where your inspired ideas fuel endless progress. At 3M, you'll help us develop the products that change the way people live and work. And you'll realize boundless opportunities for your own professional success. As a powerhouse of innovation, our industry leadership is extensive—everything from homes and health care to electronics and transportation. Whatever the challenge, our people collaborate across disciplines and around the world to take it on. Find out more about what makes 3M a uniquely rewarding place to learn, grow and contribute. Join us at 3M, and be part of what’s next.

American Process, Inc.

Sugar is the new Crude®. We are passionate about our vision.

We combine rigorous chemistry and biology with world class engineering expertise to create leading technologies for the conversion of biomass into cellulosic sugars. These sugars are used to manufacture bio-based chemicals and biofuels to displace fossil fuel derived products. We have built two large demonstration scale biorefineries where we are demonstrating our integrated cellulosic technologies and creating templates for the commercial scale plants that will follow. Our people are empowered and encouraged to challenge the status quo and bring forth new ideas. We reward employees who think outside of the box and expand the scope of their knowledge.

American Transmission Co.

American Transmission Co. was founded in 2001, as the first multi-state, transmission-only utility in the United States. Unlike most other utilities, we have a single focus: transmission. Our transmission system allows energy producers to transport electric power from where it’s generated to where it’s needed. It’s similar to the interstate highway system with high-voltage electricity traveling on the transmission system wires like vehicles on the highway. ATC provides electric transmission service in an area from the Upper Peninsula of Michigan, throughout the eastern half of Wisconsin and into portions of Illinois. Our more than 9,480 miles of high-voltage transmission lines and 529 substations provide communities with access to local and regional energy sources.

Archer Daniels Midland (ADM)

For more than a century, the people of Archer Daniels Midland Company (NYSE: ADM) have transformed crops into products that serve vital needs. Today, 31,000 ADM employees around the globe convert oilseeds, corn, wheat and cocoa into products for food, animal feed, industrial and energy uses. With more than 270 processing plants, 470 crop procurement facilities, and the world’s premier crop transportation network, ADM helps connect the harvest to the home in more than 140 countries. For more information about ADM and its products, visit www.adm.com.

Cardinal Glass Industries

Cardinal Glass Industries is a management-owned S-Corporation leading the industry in the development of residential glass for windows and doors. We have grown to more than 5,000 employees located at 32 manufacturing locations around the United States.

At Cardinal, we try to maintain a clear vision: design and fabricate the most advanced residential glass products in the industry. We start with a heavy investment in research and development. Our twin R&D centers in Minnesota and Wisconsin provide the basis for new advances in glazing fenestration.

We turn around those fresh ideas into useful products that regular homeowners can use. We provide a turnkey solution to window manufacturers: whether it starts with insulating glass, coated, laminated, tempered or just plain float glass, it is all designed to provide the latest in applied glass science.

Company structure—Cardinal Glass Industries is a corporation with these wholly-owned subsidiaries:

- Cardinal IG Company (insulating glass)
- Cardinal LG Company (laminated glass)
- Cardinal CG Company (coated glass and optical mirrors)
- Cardinal FG Company (float and tempered glass)

CN is North America’s railroad. With operations that extend east-west across Canada and north-south through the U.S., we are well positioned to capitalize on NAFTA and offer seamless service to our shipper clients. Our Southern Region extends north-south from Winnipeg Manitoba in Canada to New Orleans, LA and east-west from Pittsburg to Omaha, and comprises approximately 7,000 employees and 12,400 miles of track. Principle commodities include grain and grain products, auto parts and finished automobiles, intermodal, iron and steel, chemicals, forest products and coal. We focus our business thinking around five core principles: service, cost control, asset utilization, safety and people.

Columbus Castings (CC) is the largest single site steel foundry in North America. It manufactures steel castings for the freight and passenger rail cars, locomotives, mining equipment, industrial magnets, construction equipment and heavy industrial industries. CC’s sole manufacturing facility is located in Columbus, Ohio. It covers an area of 90+ acres—including 22 acres under roof. We currently employ 650 Central Ohio residents. We know that the business is only as good as our people, and the recognition and development of the best people will assure continued growth and improvement in the future.

Commonwealth is proud to be named a 2013 Detroit Free Press Top 100 Workplace, an EC&M Magazine Top 40 Electrical Design Firm, and an Engineering News-Record Top 500 Firm. We are an employee-owned and -managed engineering consulting firm providing world-class power generation and delivery design services to our clients, which include: major utilities; independent power producers; municipalities; industrial leaders; and some of the world’s most prestigious educational, health care, and research institutions. Commonwealth is headquartered in vibrant and family-friendly Jackson, Michigan, with branch offices in the dynamic cities of Columbus, Ohio; Atlanta, Georgia; and Mount Vernon and Spokane, Washington.

Noise and vibration issues are a never-ending challenge to engineers, designer, and scientists, as they endeavor to improve the overall performance and quality of products that make our everyday lives more enjoyable and worry-free.

At DTI, our experienced engineers and scientists create innovative solutions that meet the customer’s needs while maintaining the integrity of the original product’s purpose. This is accomplished by bringing together our unique understanding of materials, processes, manufacturing capabilities, and design tools to produce and provide efficient solutions in a timely and cost-effective manner.

Our unique understanding of the dynamic properties of materials including metals, elastomers, plastics, polymers, glass enamels, and composites enable us to bring these often-ignored characteristics to bear in our effective and cost-efficient solutions.

The DTI “difference” is our ability to effectively combine in-house research and development, understanding of structural dynamics, effective design and modeling capability, extensive prototyping capability, as well as manufacturing know-how into solutions that benefit our customers.

DTE Energy Co. (NYSE: DTE) is a diversified energy company involved in the development and management of energy-related businesses and services nationwide.

Eagle Mine a Subsidiary of Lundin Mining

Lundin Mining is a diversified base metals mining company with operations and projects in Europe, Africa, and North America, producing copper, zinc, lead and nickel. Nickel, one of the most important of such minerals, is used to make everything from cars and appliances, to aeronautics and high tech medical instruments, to household batteries and environmentally friendly hybrid cars. The Eagle Mine in northern Marquette County will be the only primary nickel mine in the U.S.A., and will generate approximately 360 million pounds of nickel. Eagle will employ approximately 250 people and generate substantial economic activity for area communities. Other communities where Lundin operates mines have experienced economic vigor that began with the mine, but has extended long after mine closure.

Eisenhower Center

Eisenhower Center is a residential rehabilitation facility based in Ann Arbor and, coming soon, our newest branch will open in Chassell, MI. From our simple beginnings as a small Los Angeles storefront, Honda in America has grown to become a top manufacturer of motorcycles, power equipment, ATVs, generators, marine engines, and of course, automobiles.

We opened our first U.S. plant in 1979 and have evolved into a company that directly employs nearly 25,000 Americans. More than 100,000 workers are employed at authorized Honda automobile, motorcycle and power-equipment dealerships in the United States. Tens of thousands of additional Americans are employed by more than nearly 600 U.S. suppliers from which Honda purchases parts and materials. Honda is proud to provide jobs that help better the American economy and will continue to work hard to do so.

Sponsored by Career Services | www.mtu.edu/career | Fall Career Fair 2014 | 57
Since 1873, Kohler associates dedication to excellence has helped forge one of the oldest and largest privately held companies in the United States. It has four major businesses: Kitchen & Bath, Interiors, Power Systems and Hospitality & Real Estate. As the 4th largest employer in WI, our diversified operations span 6 continents, with 50+ manufacturing plants worldwide and afford career opportunities for over 30,000 associates. We are a $5 billion-plus company in net sales.

Kokosing Construction Company is a family-owned, Ohio-based company and one of the largest self-performing general contractors in the Midwest. Kokosing consistently delivers high quality heavy industrial, transportation and marine construction projects by leveraging the unparalleled experience of its people, and its owned and nationally-recognized fleet of over 1200 pieces of major equipment.

Kondex’ mission is “Helping to Feed and Fuel the World.” We are a leading manufacturer of engineered components for the agricultural, biofuel, construction, forestry and turf care markets. We specialize in metallurgy, surface coatings, heat treating, machining, welding and assembly. We are ISO 9001 and ISO 14001 certified. Kondex was founded in 1974 and is privately owned. Annual sales have grown substantially. Our excellent growth has been fueled by motivated associates producing quality products, and our relentless passion for exceeding the needs of our customers. Kondex has a state-of-the-art 210,000 square foot facility that is climate controlled and utilizes enhanced process flows. We have a union-free workforce of approximately 300 associates.

Located in the Keweenaw peninsula of Michigan, Koppers Performance Chemicals is a hydrometallurgical company specializing in the recycling of copper scrap into copper compounds used in a variety of industrial applications. As a leading producer of copper chemicals in North America, we at Koppers continually pursue technological advances to produce the quality products demanded by industrial and agricultural markets.

Only a 15 minute drive from the Michigan Tech campus, Koppers offers engineering and technology students a number of opportunities to gain experience in a variety of disciplines and functions in a chemical production facility. Students at Koppers learn and grow while working with engineers and other staff on a variety of projects, including testing and analysis of operating equipment, R&D projects, and process development.

We are recruiting for a full time Electrical Engineering Tech position and twelve month Co-ops in Mechanical and Chemical Engineering. The Co-op positions would be for the calendar year 2015.
KPIT Infosystems, Inc.

KPIT Infosystems, Inc., a global product engineering and IT consulting partner, is focused on co-innovating domain intensive technology solutions for corporations specializing in automotive & transportation, manufacturing and energy & utilities. KPIT is a partner of choice to Automotive Industry to deliver best in class solutions and products across automotive subsystems and make mobility Smarter, Greener, Safer and Affordable. KPIT provides end-to-end product engineering (embedded electronics & engineering design) solutions across powertrain, Interior/Exterior (Infotainment, Instrument Clusters), Chassis, AUTOSAR, and Functional Safety.

For over 2 decades, 165+ corporations have partnered with us in their journey to success. The DNA for Innovation, the passion to deliver excellence and strong customer focus are drivers of growth at KPIT that make us clearly stand out against competition. Over 8000+ associates, across 31 offices in 15 countries, come together at KPIT to deliver—Technology!

Marinette Marine Corporation

MMC has grown into a world-class shipbuilder, having designed & built more than 1,500 vessels. MMC boasts some of the best engineering & naval architecture minds in the industry. They’re backed by a skilled, safe & motivated workforce, & a management team keenly focused on quality. The company is internationally recognized for innovative & highly efficient, modular, subassembly & assembly-line manufacturing techniques. This sophistication in construction methods has allowed Marinette to build some of the most technologically advanced vessels on the planet. Marinette Marine’s performance on government contracts is impressive. Its portfolio includes the U.S. Navy’s Littoral Combat Ship, the improved Navy Lighterage System, mine countermeasure vessels & ocean tugs, as well as U.S. Coast Guard icebreakers, buoy tenders & response vessels. Because of its record of delivering ahead of schedule and within contracted costs, MMC has a long-standing relationship with the United States Navy. Marinette Marine Corporation is part of the Fincantieri Marine Group, a subsidiary of Fincantieri, one of Europe’s largest shipbuilders with a history dating back 200 years and a track record of producing more than 7,000 ships.

Nucor Corporation

At Nucor, we believe the best steel only comes from the best employees. And the best employees should be compensated as such. So at Nucor, we pay for performance. Directly rewarding our employee’s productivity with every paycheck, often doubling or tripling their monthly salaries. An incentive so lucrative, our employees innovate better methods to make steel without any middle management oversight. Needing only to convince their teammates an idea will work, they implement new ideas from the bottom up. And with the potential to earn extra money, every employee voluntarily becomes experts, not only at their job, but also at the job of their teammates. Thus ensuring that everyone at Nucor makes two things: Great Steel and Great Money.

**Progressive Insurance**

They say if you choose a job you love, you’ll never work a day in your life. To many of us at Progressive, that quote rings true.

There’s a reason that people have worked here for years and years and years. It’s because Progressive is a special type of place:

- Where taking chances and pushing innovation is a way of life
- Where you don’t stop until a job is finished
- Where hard work is celebrated and rewarded
- Where you can meet interesting people who can teach you amazing things

UOP, A Honeywell Company

UOP is the recognized leader in developing and licensing process technology used by refiners and petrochemicals producers to produce gasoline, diesel, jet fuel and the building blocks for plastic and other products. It also develops and sells catalysts, adsorbents, equipment, process plants and technical services. UOP is pioneering technology to get plastics from natural gas and to get more valuable products out of every barrel of oil. UOP has also developed technology to produce real fuels from renewable energy sources, including Honeywell Green Diesel™ and Honeywell Green Jet Fuel™, which was used to power the first transatlantic biofuel flight.

US Department of State

The Department of State is the Federal agency responsible for the formulation and implementation of U.S. foreign policy. The Department’s personnel represent the U.S. and protect its interests and citizens around the world. The State Department seeks high caliber employees with the skills and competencies needed to deal with the demands of the coming decades. It recruits a diverse group of individuals with knowledge not only in areas traditionally associated with diplomacy (such as history, political science, international relations, and economics), but also those with backgrounds in business, office management, public administration, natural sciences, communications, law, information management and security. Its 25,000 U.S. employees (Foreign Officers and Specialists and Civil Servants) serve domestically, primarily in Washington DC, and at 265 embassies and consulates in over 160 foreign countries. The Department of State also has a robust fall, spring, and summer internship program that offers students a variety of interesting and challenging jobs in Washington and overseas in U.S. Embassies and Consulates.

Full-Time, Co-Op and Internship opportunities

BuhlerPrince is the global technology partner in the supply of smart die casting solutions. Our new die casting cells set standards in terms of capacity and integration. Dies are at the heart of the die casting process, being essential to the manufacture of high-grade products. The best machine will only offer customers decisive advantages if also the die concept and the component design are carefully matched. Buhler supports its customers from process-specific die design to die cavity filling and solidification simulations, up to the point of readiness for quantity production.

BuhlerPrince is a specialist in die-casting technology for all kinds of light metal alloys. Customized and effective solutions are provided for aluminum and magnesium. Production plants using technology that has been refined over decades and in-depth knowledge of process structures in die-castings form the foundation for the efficient production of the most demanding and complex components for industry. Buhler provides optimized casting cells and aligned process controls, and gives advice on die design and the selection of metal alloys. Buhler supports its customers in all phases of a project – from planning to start-up and beyond. This allows for fast and reliable completion of extensive projects.

Practical training programs and an extensive range of services ensure a trouble-free and profitable production over the lifetime of a system. Buhler is active in over 140 countries around the world and operates its own technology centers in Europe, Asia and North America that provide advice to the customers on all matters regarding die-casting technology.

To apply go to www.buhlerprince.com employment opportunities.
