Welcome to a world where your inspired ideas fuel endless progress. At 3M, you’ll help us develop the products that change the way people live and work. And you’ll realize boundless opportunities for your own professional success. As a powerhouse of innovation, our industry leadership is extensive—everything from homes and health care to electronics and transportation. Whatever the challenge, our people collaborate across disciplines and around the world to take it on. Find out more about what makes 3M a uniquely rewarding place to learn, grow and contribute. Join us at 3M, and be part of what’s next.

www.3m.com

A&B Process Systems is a recognized leader in the design, manufacturing and installation of high quality process systems. We are a strategic supplier to many Fortune 100 companies.

Founded in 1973, we have built a solid reputation in the industries we serve:

- Food/Beverage/Dairy
- Pharmaceutical/Personal Care
- Industrial/Chemical
- Water Treatment
- Renewable Energy
- Pulp & Paper

We provide complete in-house: Design/Engineering/Fabrication/Automation/Installation of:

- Tanks and Vessels
- Heat Exchangers
- Transfer Panels
- Skids and Platforms
- Process Modules
- Melt Systems
- Clean-In-Place (CIP) Systems

www.abprocess.com

Every day, the 30,000 people of Archer Daniels Midland Company work to connect the harvest to the home, turning crops into renewable products that serve the vital needs of a growing world. At more than 265 processing plants and more than 460 sourcing facilities, we trade, transport, store and process corn, oilseeds, wheat and cocoa into products for food, animal feed, industrial and energy uses. We are committed to the responsible, sustainable development of agriculture throughout the world.

www.adm.com

As one of the world’s leading staffing companies, our primary objective is clear-cut: To perfectly align the best people with appropriate positions for our clients everywhere. Every day, we talk to hiring managers, HR directors, procurement managers, and senior management to learn their needs. At the same time, we’re bringing in candidates and associates with a variety of skills and backgrounds, seeing how we can best put their skills to use.

**Amway Corporation**

As an $11.3 billion dollar pioneer in the direct selling industry, Amway has been helping the world live better lives since 1959. With more than 20,000 employees worldwide, we are a consumer goods manufacturer supporting more than three million independent business owners who provide products and services in 80-plus countries and territories.

Based in Ada, Michigan, Amway is not only a center of health, home and skincare innovation and top-selling, global brands. We are a company committed to providing employees with challenging career opportunities, a comprehensive total rewards package, profit sharing, tuition assistance, product discounts and an award-winning wellness program with on-site fitness facilities in Ada, Michigan, and Buena Park, California. Here, you have the opportunity to add value and be valued—to deliver your highest value professionally, while building relationships with exceptional people who genuinely value you. For more information or to apply, visit our website at www.amway.com/careers

**American Axle & Manufacturing (AAM)**

AAM was founded in 1994, with manufacturing expertise rooted in more than 90 years of experience. Today, AAM is a leading, Tier-One global automotive supplier of driveline and drivetrain systems and related components for light trucks, SUVs, passenger cars, crossover vehicles and commercial vehicles.

**AMEC**

AMEC is a focused supplier of consultancy, engineering and project management services to its customers in the world’s oil and gas, mining, clean energy, environment and infrastructure markets.

**American Transmission Co.**

American Transmission Company is the first for-profit, transmission-only company. As a business, we own, plan, maintain, monitor and operate electric transmission assets in portions of Wisconsin, Michigan and Illinois.

More important than being the first, is being the best. We have set out to define what a good transmission company can do for our customers. By operating well, striving to provide exemplary customer service, planning and constructing new facilities to meet customer needs and rewarding our investors with a fair return, ATC will remain at the top of this new business.

In the transmission business, we bring together those who create power with those who flip the switch. Our transmission system enables energy producers to deliver electric power to their end users 24 hours a day, seven days a week. Our system currently includes approximately 8,600 circuit miles of high-voltage lines and approximately 450 substations owned by ATC wholly or in part. It connects local energy users to power plants located across the entire eastern United States and Canada.

**www.amway.com**
Step into a high voltage career

Be part of an energizing workplace...

a national energy leader, growing business and an environmental frontrunner.

Check out our internship, co-op and career opportunities:

American Transmission Company®

Helping to keep the lights on, businesses running and our employees energized.

American Transmission Co. is a Wisconsin-based company that owns and operates the electric transmission system in portions of the Upper Midwest. We have Wisconsin offices in Pewaukee, Madison, De Pere and Kingsford, Mich.

ATC is an equal opportunity employer functioning under an affirmative action plan. We encourage minorities, women, covered veterans and individuals with a disability to apply.

LOOKING FOR AN INTERNSHIP?

LOOK NO FURTHER THAN AMWAY.

We seek the best and brightest talent from colleges and universities in the United States and beyond, with the intention to hire interns who do great work.

GREAT THINGS HAPPEN HERE.
At Amway, we believe that our success comes from discovering and inspiring the potential of people, as it has for more than 50 years. That’s why we invest in our employees and nurture their well-being.

ADD VALUE. BE VALUED.
**Appleton Marine, Inc.**

At Appleton Marine, we accelerate applied innovation to add value to products and processes for our customers. We achieve this because we have an adaptive mindset. Our company is born from a heritage of paper coating, chemistry and formulation. We have been successful because we are a nimble, dynamic organization. One that can take a century of skills and adapt them to opportunities presented now and ones that are yet to be discovered.

We embrace collaboration, drive continuous and sustained improvement, and recognize that good ideas come from many sources: employees, customers and partners.

www.arbornetworks.com
ARCADIS is an international company that provides consultancy, design, engineering and management services in the fields of Infrastructure, Water, Environment and Buildings. Over the years, we have worked diligently to retain our core values, and we’ve made it our priority to ask ourselves the tougher questions about who we want to be—as a trusted consultant, as an employer, and as a corporate citizen.

With more than 22,000 employees and more than $3.3 billion in revenues the company has an extensive international network that is supported by strong local market positions. We rank among the top 10 management and engineering consultancies in the world. In Europe, Brazil and Chile we have a top 5 position. In the global environmental market we are positioned in the top 3.

www.arcadis-us.com

ArcelorMittal is the world’s largest steel company with 260,000 employees in 60 countries. We are always looking for the best, brightest minds to help us transform the future of steel. In return, we offer a engaging work environment that allows our employees many unique opportunities to explore the latest technological advances—advances that will ensure our position of strength and leadership for years to come.

www.workforarcelormittal.com

Ardisam, Inc., a family owned company based in Cumberland, Wisconsin, is approximately 90 miles northeast of the Twin Cities. The company has been making innovative outdoor products since 1960. The continuously growing company has a broad range of products, which includes lawn and garden machinery, hunting gear and ice fishing gear. Ardisam’s products are distributed around the country and we continue to export to a growing number of countries around the world.

www.bakerconcrete.com
**Barracuda Networks, Inc.**
Barracuda Networks, Inc. offers industry-leading solutions designed to solve mainstream IT problems—efficiently and cost effectively—while maintaining a level of customer support and satisfaction second to none. Our products span three distinct markets, including: 1) content security, 2) networking and application delivery, as well as 3) data storage, protection and disaster recovery.

**Barr Engineering Co.**
Barr is an employee-owned consulting company that integrates engineering and environmental expertise to help to develop, manage, and restore natural resources for clients across the nation and the world. Today, our nearly 700 staff in Minnesota, Michigan, Missouri, North Dakota, and Calgary, Alberta work with clients in the mining, power, refining, and manufacturing industries and all levels of government. Our projects include assessment and remediation of contaminated sites, engineering and design of structures and processes, environmental management and compliance assistance and water resources management.

Please visit www.barr.com/careers to view a full listing of our available positions and to apply online.

**Baker Hughes, Inc.**
A top-tier oilfield service company with a century-long track record, Baker Hughes delivers solutions that help oil and gas operators make the most of their reservoirs.

**Bauer Controls**
Bauer Controls is an industry leader in developing data collection, data analysis, test control, and data reporting software. We also provide test integration services and specialize in developing production test applications. Whether it is product testing, process monitoring, or data reporting, we develop solutions for any manufacturer that requires quantitative or qualitative measurements.

We are routinely recognized for our ability to exceed customer expectations by providing quality products and exceptional customer service. We believe our staff is the foundation of our success and strive to hire only the most qualified people. Our work environment is challenging and rewarding as we regularly develop applications and solutions for emerging technologies.
Becher-Hoppe Associates, Inc. provides a wide spectrum of professional services to government, business and individuals from our headquarters in Central Wisconsin. We provide planning, design and construction services for civil engineering and architecture projects that involve airports; highways, bridges, roadways and trails; municipal buildings; water and wastewater treatment systems; municipal utilities; storm water management and dams; solid waste facilities; real estate appraisal and acquisition; and land surveying, mapping and land planning. We have been serving our clients continuously since 1954.

Belcan is a leading provider of qualified personnel to many of the world’s most respected enterprises. We offer excellent opportunities for contract/temporary, temp-to-hire, and direct assignments in the technical, IT, professional, clerical, and light industrial fields. Full-Time, Co-Op and Internship opportunities

BuhlerPrince is the global technology partner in the supply of smart die casting solutions. Our new die casting cells set standards in terms of capacity and integration. Dies are at the heart of the die casting process, being essential to the manufacture of high-grade products. The best machine will only offer customers decisive advantages if also the die concept and the component design are carefully matched. Buhler supports its customers from process-specific die design to die cavity filling and solidification simulations, up to the point of readiness for quantity production.

BuhlerPrince is a specialist in die-casting technology for all kinds of light metal alloys. Customized and effective solutions are provided for aluminum and magnesium. Production plants using technology that has been refined over decades and in-depth knowledge of process structures in die-castings form the foundation for the efficient production of the most demanding and complex components for industry. Buhler provides optimized casting cells and aligned process controls, and gives advice on die design and the selection of metal alloys. Buhler supports its customers in all phases of a project – from planning to start-up and beyond. This allows for fast and reliable completion of extensive projects.

Practical training programs and an extensive range of services ensure a trouble-free and profitable production over the lifetime of a system. Buhler is active in over 140 countries around the world and operates its own technology centers in Europe, Asia and North America that provide advice to the customers on all matters regarding die-casting technology.

To Apply go to www.buhlerprince.com employment opportunities.

Cliffs Natural Resources

A member of the S&P 500 Index, the Company is a major global iron ore producer and a significant producer of high- and low-volatile metallurgical coal. Cliffs’ strategy is to continually achieve greater scale and diversification in the mining industry through a focus on serving the world’s largest and fastest growing steel markets. Driven by the core values of social, environmental and capital stewardship, Cliffs associates across the globe endeavor to provide all stakeholders operating and financial transparency.

The Company is organized through a global commercial group responsible for sales and delivery of Cliffs products and a global operations group responsible for the production of the minerals the Company markets. Cliffs operates iron ore and coal mines in North America and two iron ore mining complexes in Western Australia. In addition, Cliffs has a major chromite project, in the pre-feasibility stage of development, located in Ontario, Canada.

www.eaglemine.com

The Eagle Mine is located 25 miles from Marquette, Michigan. Eagle is a near surface high grade nickel copper deposit that will be mined underground by a contractor using long-hole stopping and with ramp access. The mine which is currently under development, is located in a pristine forest area 63 miles from the Brownfield Humboldt mill where the new concentrator will be built. Ore will be mined at the rate of approximately 2,000 tons per day and trucked from the mine using a contract trucking service. The facility is expected to produce 23,000 tons nickel and 20,000 tons of copper metal annually with concentrates shipped to customers by rail.

The facilities are currently under construction and are to be completed during Q3 2014. Commissioning and ramp up will follow and full production is to be achieved at the beginning of the Q1 2015. As of now the mine is approximately 80 percent complete while the concentrator construction is at 15 percent.

Kautex Textron

We are 5,379 employees in 15 countries. We are Kautex. Our company is one of the 100 largest automotive suppliers in the world in terms of sales volume. We are the market leader in four of our six product lines. Each and every one of us contributes to these results. And we are proud of them. Satisfying our customers is our highest priority: your success is our success. We focus on understanding and fulfilling your requirements. We do this every day—with commitment and passion.

For us, working successfully means working together. Not only within each department, but also across the company in multi-functional teams. Working successfully also means having qualified and committed employees. That’s why we support the creativity and personal development of each individual employee—and that’s a major reason why we have corporate-wide training centers. Our company constantly changes to stay abreast of current market conditions. Striving for continuous improvement, standardization, and the lean approach in all of our processes is a part of it. We are Kautex!

Marinette Marine Corporation

Marinette Marine Corporation was founded in 1942 along the Menominee River in Marinette, Wisconsin to meet America’s growing demand for naval construction. From humble beginnings with a contract to build five wooden barges, MMC has grown into a world-class shipbuilder, having designed and built more than 1,500 vessels.

MMC boasts some of the best engineering and naval architecture minds in the industry. They’re backed by a skilled, safe and motivated workforce, and a management team keenly focused on quality. The company is internationally recognized for innovative and highly efficient, modular, subassembly and assembly-line manufacturing techniques. This sophistication in construction methods has allowed Marinette to build some of the most technologically advanced vessels on the planet.

Marking Services, Inc.

MSI is on the forefront of asset identification and industrial labeling with innovative products and services that help companies reduce human errors, support training, facilitate application of in-plant procedures and ensure consistent plant labeling. As a niche Turnkey labeling contractor, MSI functions as a single point of responsibility for the implementation of all pipe labeling, valve tagging, and equipment identification on major construction projects as well as existing plants.

The best identification is that which takes operationally critical information directly from project or plant P&ID’s and puts it into the plant where it is most meaningful for safe, efficient operations. MSI asset identification and industrial labeling services allow you to clearly communicate valuable information from P&ID’s.

Nissan North America

Innovation that excites. It's the inspiration for everything we do. For Nissan, it means rethinking the ordinary, pushing the boundaries, exceeding expectations, and anticipating the needs of an ever-changing planet. Every Nissan and Infiniti vehicle is a result of this passionate mindset, yet with a practical side that reflects the times. This means driving enjoyment rooted in the highest standard of engineering and quality, and fresh, modern design matched by manufacturing excellence. The same philosophy also drives our look to the future, through low emissions, better fuel economy and emerging role of all-electric vehicles.

www.nissan.jobs

Norfolk Southern Corporation is a leading North American transportation provider. Its Norfolk Southern Railway subsidiary operates approximately 20,000 route miles in 22 states and the District of Columbia, serves every major container port in the eastern United States, and provides efficient connections to other rail carriers. Norfolk Southern operates the most extensive intermodal network in the East and is a major transporter of coal and industrial products.

Northeast Technical Services, Inc.

NTS began with services managing, operating, and maintaining water and wastewater treatment plants and providing basic wet chemistry laboratory analysis to these facilities. NTS at that time employed a staff of six. Since then NTS has evolved into a full-service, professional service environmental company employing approximately 50 employees. We believe the company has developed, attained and maintained a premier client base as a result of a reputation for providing quality services on a competitive and timely basis. NTS provides a broad spectrum of environmental services in areas such as Site Assessment/Investigation, Water Resources, Waste, and Construction Management. Since 1985, NTS has evolved into a full-service environmental company providing consulting, engineering, engineering support services, and data management. Our company is located in Virginia, Minnesota.

Nucor Steel

At Nucor, we believe the best steel only comes from the best employees and the best employees should be compensated as such. So at Nucor, we pay for performance, directly rewarding our employee’s productivity with every paycheck, often doubling or tripling their monthly salaries. This is an incentive so lucrative, our employees innovate better methods to make steel without any middle management oversight. Needing only to convince their teammates an idea will work, they implement new ideas from the bottom up. With the potential to earn extra money, every employee voluntarily becomes an expert, not only at their job, but also at the job of their teammates, thus ensuring everyone at Nucor makes two things, Great Steel and Great Money.

**Severstal North America**

Severstal North America is one of the largest steelmakers in the United States specializing in the next generation of high quality, flat-rolled, carbon steel products. Our modernized, fully integrated operations and corporate headquarters are located in Dearborn, Michigan. In addition, a new, state-of-the-art electric arc furnace operation in Columbus, Mississippi, serves the growing demand for steel in the southeastern United States. Severstal North America also operates several joint ventures for value-added coated products and coke making.

By investing heavily in technology at all our facilities—more than $3 billion over the last few years—we are reinventing the future of steel in North America.

Steel Dynamics

Steel Dynamics and Magnetation have partnered to build the new Mining Resources facility near Hibbing, Minnesota to process natural ore tailings basins and produce iron ore concentrate. The plant implements new magnetic separation technology to recover hematite ore from previously discarded waste streams generated by mining operations from the 1930s through the 1960s. New technology employed by the Mesabi Nugget operation now produces the world’s first and only iron nuggets that are pure enough to supplant imported pig iron in mini-mill steel production. Mesabi Nugget uses Minnesota iron ore to produce 97-percent pure, metallic iron nuggets that are perfectly suited for use in EAFs-ushering a New Age of Iron for Minnesota’s Iron Range.

Cooperative Education Program
The Value of an Undergraduate Co-op

Michigan Tech’s Undergraduate Co-op Program provides students excellent hands-on experience in their academic field.

Students have the opportunity to work for employers in the U.S. and abroad for fall, spring or summer semesters, while earning a great salary and academic credit.

Did you know …
- Co-op experience is considered one of the most valuable qualifications employers seek?
- Some employers offer free or subsidized housing, tuition reimbursement and a company vehicle?
- Our co-op locations span from Alaska to Bolivia and from California to Germany?

A few undergraduate co-op employers:

- Continental Corporation
- Cummins
- Denso International
- Dow Chemical
- DTE Energy
- FEV, Inc.
- GE Aviation
- Greenheck Fan Corporation
- Integrys Energy Group
- Kohler
- Mercury Marine
- Nucor
- Polaris Industries
- Union Pacific Railroad

Here’s what some of our co-op students had to say about their experience:
- “A co-op is a glimpse of what your future career may look like.”
- “It may put your graduation date back but the experience is what employers look at, not how long it took to graduate. My co-op experience was the most beneficial step in acquiring my degree.”

Co-op basics:
- Interested students apply for available positions, and if offered a co-op opportunity, register with the Co-op Office in Career Services.
- Co-op students earn 2 academic credits for each semester of co-op, and are considered continuously enrolled students while on assignment.
- The Co-op course is hosted in Canvas. All assignments are submitted through the online system. Students are able to connect with one another within the software.

Want to learn more?
Visit the Co-op Program’s website at http://www.mtu.edu/career/students/coops-internships/
