Visualize the course plan for the Photonics Concentration in the BSEE program at Michigan Tech, with a focus on the 2014-2015 catalog year. The plan outlines a sample plan for students to follow, including course sequences, prerequisites, and co-requisites. The plan is designed to prepare students for a career in photonics, with a focus on electives and co-curricular activities. Students are encouraged to consult the course catalog and Schedule of Classes for up-to-date information. The plan includes a total of 128 credits, with 3 units of co-curricular activities. Undergraduate advisors are available to assist students in scheduling appointments. The plan is updated regularly to reflect changes in course offerings and requirements.
