Cognitive and Learning Sciences - ACCOMPLISHMENTS

Dept Highlights:

1. New graduate certificate program in Post-secondary STEM Education is approved and accepting students this fall. It is designed for students who anticipate working within education field (i.e., as faculty) or conducting education related research.

2. RISE institute (Research and Innovation in STEM Education) will be approved as soon as supporter signatures are collected. Researchers who have projects with outreach components involving teachers or students, are conducting disciplinary-based education research, or transdisciplinary education research are encouraged to submit through the institute. A WEB presence is being developed. Contact Brad Baltensperger, director, for more information.
